14 programs

9 Health&Rehabilitation – 5 Beauty&Fitness

**Physiolaser 500** accelerates the inflamed tissue recovery, regenerates cells and improves microcirculation.

**Physiolaser 500** is especially effective in all the situations where the muscle/articular tissue is inflamed. Inflammation is usually due to a reduced micro-circulation. In return the circulation reduction reduces the blood quantity arriving to the cells, causing an ischemic damage.

Reducing the ischemic time, **Physiolaser 500** reduces the pathology duration and the relative pain.

**Physiolaser 500** accelerates the healing and the pain elimination both used alone and together with other therapeutic modalities. It allows in this way to reduce the use of analgesics and anti-inflammatories.

**Physiolaser 500** enhances the natural healing body process without pain.

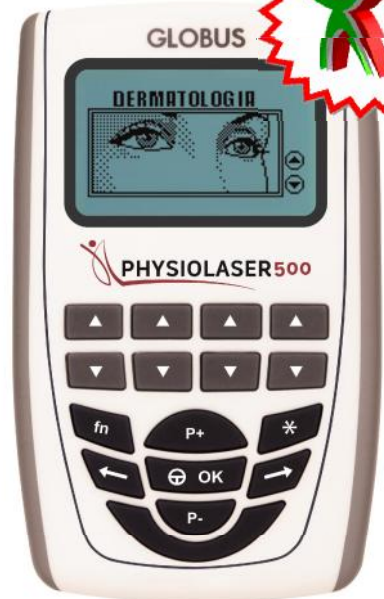

- 9 Health&Rehab programs
- 5 Beauty&Fitness

Programmable: in multi-spot mode and scansion mode

The main therapeutic effects are:

- Anti-inflammatory effect
- Anti-edemigenous effect
- Biostimulating effect
- Analgesic effect

Physiolaser 500 enhances the natural healing body process.

## TECHNICAL FEATURES

Medical Device of II b class  
Laser of IV Class  
Power (CEI EN 60825-1): 500 mWatt  
Beam divergence: 13°  
Laser type: Ga Al As Diode  
Beam length: 808  
Spot size: 3,5 mm and 11.5mm  
Operation mode: continuous and pulsed  
Programmable: in multi-spot mode and scanning mode  
In compliance with the directive 93/42/CEE-2007/47/CEE

## EQUIPMENT

1 Carrying case  
1 Physiolaser 500 unit  
1 Handpiece Laser  
1 pair of glasses for the patient  
1 pair of glasses for the operator  
1 Operating manual  
1 power supply
