# manual rack adjust

KYNETT

# KYNETT

**Pay attention! The wall rack must be securely attached to a solid concrete wall!**

**Step 1**
First place the bottom-support of the adjust to the bottom bar of the rack.

**Step 2**
Then loosen the knob of the top-support, slide the support to the (maximum) highest bar and tighten the knob again.

# KYNETT

**Pay attention! The wall rack must be securely attached to a solid concrete wall!**

## Step 3

Pay attention! Always make sure you click the Kynett ONE securely into the bracket. You should hear a distinct click twice (below and above).

## Step 4

To adjust the height of the bracket loosen the knob, pull the knob, slide the bracket, click on the correct height and tighten the knob again
